C0. Introduction

C0.1

(C0.1) Give a general description and introduction to your organization.

CBRE Group, Inc. (NYSE:CBRE), a Fortune 500 and S&P 500 company headquartered in Los Angeles, is the world's largest commercial real estate services and investment firm (based on 2017 revenue). The company has more than 80,000 employees (excluding affiliates), and serves real estate investors and occupiers through approximately 450 offices (excluding affiliates) worldwide. CBRE offers a broad range of integrated services, including facilities, transaction and project management; property management; investment management; appraisal and valuation; property leasing; strategic consulting; property sales; mortgage services and development services. Please visit our website at www.cbre.com.

C0.2

(C0.2) State the start and end date of the year for which you are reporting data.

<table>

C0.3

(C0.3) Select the countries/regions for which you will be supplying data.

C0.4

(C0.4) Select the currency used for all financial information disclosed throughout your response.

USD

C0.5

(C0.5) Select the option that describes the reporting boundary for which climate-related impacts on your business are being reported. Note that this option should align with your consolidation approach to your Scope 1 and Scope 2 greenhouse gas inventory.

Operational control

C1. Governance

C1.1

(C1.1) Is there board-level oversight of climate-related issues within your organization?

No

C1.1c
### C1.1c) Why is there no board-level oversight of climate-related issues and what are your plans to change this in the future?

<table>
<thead>
<tr>
<th>Primary reason</th>
<th>Board-level oversight of climate-related issues will be introduced within the next two years</th>
<th>Please explain</th>
</tr>
</thead>
<tbody>
<tr>
<td>We have not historically had board-level oversight of climate-related issues. However, a member of our board of directors has been an active participant in our Global Corporate Responsibility Steering Committee for the past three years, and climate-related issues are covered at these committee meetings.</td>
<td>Yes, we plan to do so within the next two years</td>
<td>We recognize the importance of the board being informed about and understanding climate-related risks. We plan to introduce board-level oversight of climate-related issues within the next two years. This may take the form of monitoring and overseeing progress against goals and targets for addressing climate-related issues.</td>
</tr>
</tbody>
</table>

### C1.2

#### C1.2) Below board-level, provide the highest-level management position(s) or committee(s) with responsibility for climate-related issues.

<table>
<thead>
<tr>
<th>Name of the position(s) and/or committee(s)</th>
<th>Responsibility</th>
<th>Frequency of reporting to the board on climate-related issues</th>
</tr>
</thead>
<tbody>
<tr>
<td>Other, please specify (Executive VP, General Counsel)</td>
<td>Both assessing and managing climate-related risks and opportunities</td>
<td>As important matters arise</td>
</tr>
</tbody>
</table>

### C1.2a

#### (C1.2a) Describe where in the organizational structure this/these position(s) and/or committees lie, what their associated responsibilities are, and how climate-related issues are monitored.

The Executive Vice President, General Counsel reports directly to the CEO. The Senior Vice President, Corporate Responsibility reports directly to General Counsel and is responsible for leading global corporate responsibility strategy development and implementation. Environmental sustainability is an element of corporate responsibility at our company. The corporate responsibility team is responsible for setting of greenhouse gas emission reduction targets and monitoring and reporting of progress toward those targets. The team also stays informed about climate-related topics through participation in industry organizations and brings that information into the company for consideration.

### C1.3

#### (C1.3) Do you provide incentives for the management of climate-related issues, including the attainment of targets?

Yes

### C1.3a

#### (C1.3a) Provide further details on the incentives provided for the management of climate-related issues.

**Who is entitled to benefit from these incentives?**

In 2017, we created the CBRE Climate Change Champion Award, which is presented to Asset Services teams for CBRE-managed properties that achieve a 10% or greater year-over-year increase in their ENERGY STAR score. In 2018, this award was presented to teams at 22 CBRE-managed properties. These buildings together resulted in a total greenhouse gas emission reduction of 10,188 metric tons of CO2e.

**Types of incentives**

- Energy reduction target
- Recognition (non-monetary)
- Facilities manager

**Activity incentivized**

In 2017, we created the CBRE Climate Change Champion Award, which is presented to Asset Services teams for CBRE-managed properties that achieve a 10% or greater year-over-year increase in their ENERGY STAR score. In 2018, this award was presented to teams at 22 CBRE-managed properties. These buildings together resulted in a total greenhouse gas emission reduction of 10,188 metric tons of CO2e.

**Comment**

<td>3 to 6 years</td>
<td></td>
</tr>
</tbody>
</table>

C2.2b

(C2.2b) Provide further details on your organization’s process(es) for identifying and assessing climate-related risks.

Climate change has been recently added as a risk in the CBRE Business Risk Inventory (BRI). Risks included in the BRI are assessed through our enterprise risk management process every two years to determine the appropriate level of action required.

C2.2c

(C2.2c) Which of the following risk types are considered in your organization’s climate-related risk assessments?

<table>
<thead>
<tr>
<th>Relevance &amp; Inclusion</th>
<th>Please explain</th>
</tr>
</thead>
<tbody>
<tr>
<td>Current regulation</td>
<td>Relevant, sometimes included</td>

</tbody>
</table>

C2.2d

(C2.2d) Describe your process(es) for managing climate-related risks and opportunities.

The Director of Corporate Responsibility is responsible for evaluating climate change risks and opportunities on an ongoing basis. The Director of Corporate Responsibility provides regular briefings on risks and opportunities to the Senior Vice President of Corporate Responsibility, who provides updates as relevant to General Counsel.

C2.3

(C2.3) Have you identified any inherent climate-related risks with the potential to have a substantive financial or strategic impact on your business?

Yes

C2.3a
(C2.3a) Provide details of risks identified with the potential to have a substantive financial or strategic impact on your business.

Our current method for managing the risk is to incorporate employee sustainability training as part of CBRE’s protocol. CBRE continues to place a strong focus on equipping building staff with the knowledge, proper tools and best practices they need to successfully manage and reduce energy consumption. In partnership with Building Owners and Managers Association International (BOMA), CBRE licenses BOMA Energy Efficiency Program (BEEP) training and offers weekly webinars to employees. Using the EPA ENERGY STAR Portfolio Manager as a foundational tool, BEEP educates industry professionals on how to reduce energy consumption and costs with proven no- and low-cost strategies for optimizing equipment, people and practices. While this training program requirement has been in place for many years for all property management staff, during 2016 the training curriculum was expanded as required learning for all national engineering staff. In total, more than 23,000 attendees had participated in the four-part weekly training series by the end of 2017.

**Where in the value chain does the risk driver occur?**

Our current method for managing the risk is to incorporate employee sustainability training as part of CBRE’s protocol. CBRE continues to place a strong focus on equipping building staff with the knowledge, proper tools and best practices they need to successfully manage and reduce energy consumption. In partnership with Building Owners and Managers Association International (BOMA), CBRE licenses BOMA Energy Efficiency Program (BEEP) training and offers weekly webinars to employees. The inability to provide services for climate change-related requirements as a result of staff not being adequately trained is a risk to our business reputation. The inability to provide these services will reduce the demand for our services and impact our service capacity.

Identifier
5000000

During 2017 CBRE provided some level of these services for approximately 2.25 billion square feet of client owned and managed space. These services included benchmarking more than 6200 buildings in the EPA ENERGY STAR program and completing 478 green building certifications. On behalf of more than 1.9 billion square feet of managed client space in the Americas and EMEA, our team identified more than $75 million in energy savings.

Our 2017 revenue from energy and sustainability services was $65,500,000. We expect these revenues to significantly expand in future years.

65500000
Medium
Likely
Current

As more governing entities enact energy disclosure regulations, and as more companies respond to the growing need to measure, report, and reduce their energy usage and the related carbon emissions, CBRE’s opportunity to provide a range of energy and sustainability services expands.

Better competitive position to reflect shifting consumer preferences, resulting in increased revenues

Our current method for managing the effects of severe weather events is through CBRE’s Business Continuity program, which provides planned emergency responses to safeguard people, properties and the interests of employees, tenants and clients. The program addresses such vital areas as data back-up and recovery; alternative communications with tenants, clients and employees; and alternative physical locations. CBRE’s managers also include weather changes in business planning. For example, managers take into consideration the potential for market impact arising from persistent droughts and severe weather events limiting expansion of the real estate markets in some areas while encouraging expansion in less weather-stricken areas.

C3. Business Strategy

C3.1

(C3.1) Are climate-related issues integrated into your business strategy?
Yes

C3.1a

(C3.1a) Does your organization use climate-related scenario analysis to inform your business strategy?
No, but we anticipate doing so in the next two years
(C4.1a) Provide details of your absolute emissions target(s) and progress made against those targets.

Target reference number

While it appears that we have already achieved this goal, we know that our Scope 1 emissions fluctuate each year due to changes in the number of vehicles we own. In 2017, our fleet count decreased due to a reduction in the number of owned vehicles associated with client-managed accounts. We also saw a decrease in average per-vehicle miles in our EMEA region.

Underway

100

Yes, we consider this a science-based target, but this target has not been approved as science-based by the Science-Based Targets initiative

Energy efficiency: Building services

Description of activity
During 2017, CBRE provided energy and sustainability services for more than 1.8 billion square feet of client space and identified more than $75 million in energy savings. When fully accomplished, these projects will eliminate more than 425,000 metric tons of CO2e.

Estimated annual CO2e savings (metric tonnes CO2e)
During 2017, CBRE provided energy and sustainability services for more than 1.8 billion square feet of client space and identified more than $75 million in energy savings. When fully accomplished, these projects will eliminate more than 425,000 metric tons of CO2e.

Scope
During 2017, CBRE provided energy and sustainability services for more than 1.8 billion square feet of client space and identified more than $75 million in energy savings. When fully accomplished, these projects will eliminate more than 425,000 metric tons of CO2e.

Voluntary/Mandatory
During 2017, CBRE provided energy and sustainability services for more than 1.8 billion square feet of client space and identified more than $75 million in energy savings. When fully accomplished, these projects will eliminate more than 425,000 metric tons of CO2e.

Annual monetary savings (unit currency – as specified in CC0.4)
During 2017, CBRE provided energy and sustainability services for more than 1.8 billion square feet of client space and identified more than $75 million in energy savings. When fully accomplished, these projects will eliminate more than 425,000 metric tons of CO2e.

Investment required (unit currency – as specified in CC0.4)
During 2017, CBRE provided energy and sustainability services for more than 1.8 billion square feet of client space and identified more than $75 million in energy savings. When fully accomplished, these projects will eliminate more than 425,000 metric tons of CO2e.

Payback period
During 2017, CBRE provided energy and sustainability services for more than 1.8 billion square feet of client space and identified more than $75 million in energy savings. When fully accomplished, these projects will eliminate more than 425,000 metric tons of CO2e.

Estimated lifetime of the initiative
During 2017, CBRE provided energy and sustainability services for more than 1.8 billion square feet of client space and identified more than $75 million in energy savings. When fully accomplished, these projects will eliminate more than 425,000 metric tons of CO2e.

Comment
During 2017, CBRE provided energy and sustainability services for more than 1.8 billion square feet of client space and identified more than $75 million in energy savings. When fully accomplished, these projects will eliminate more than 425,000 metric tons of CO2e.

Activity type
By the end of 2017, we had opened 65 Workplace360 offices worldwide, representing 24% of our global occupied square footage. An additional 22 Workplace360 offices are underway in 2018. Each Workplace360 office is a “free address” environment, supported by leading-edge technology tools and platforms. Assigned offices and workstations are eliminated; instead, up to 15 different types of workspaces are offered based on carefully calculated employee usage patterns. In these new spaces, we have reduced our footprint significantly while offering greater functionality and flexibility. This has resulted in lower energy use and carbon emissions.

(C4.5) Do you classify any of your existing goods and/or services as low-carbon products or do they enable a third party to avoid GHG emissions?

Yes

C4.5a

(C4.5a) Provide details of your products and/or services that you classify as low-carbon products or that enable a third party to avoid GHG emissions.

Level of aggregation
Revenue from energy and sustainability services totaled more than $65.6 million across our United States and EMEA regions. [Note that while we also provided energy and sustainability services throughout our APAC region, we do not have data for that region at this time.]

0.5

Please select

Avoided emissions

Our environmental sustainability services directly enable third parties to avoid Scope 1 and Scope 2 emissions associated with energy use. These services include: a) Energy Program Management - CBRE has built a network of energy program professionals to manage our clients' energy consumption. Utilizing best practices, these energy managers offer CBRE-developed solutions to help clients gain a competitive advantage while driving towards peak energy performance. Strategies include: Strategic Program Planning, Utility Data and Carbon Footprint Management, Demand/Supply- Side Energy Management, Performance Reporting, Training and Awareness Programs. b) Certification Programs – CBRE helps clients improve operating efficiencies and document cost savings to provide owners and occupiers of commercial property with a market-leading economic advantage. CBRE provides expert support in green building certification standards for BREEAM, NABERS, ISO 14001, LEED and others.

C5.2

Select the name of the standard, protocol, or methodology you have used to collect activity data and calculate Scope 1 and Scope 2 emissions.

C6. Emissions data

C6.1

(C6.1) What were your organization's gross global Scope 1 emissions in metric tons CO2e?

**Row 1**
- **Gross global Scope 1 emissions (metric tons CO2e)**: 46,057
  - **End-year of reporting period**: <Not Applicable>
  - **Comment**

C6.2

(C6.2) Describe your organization's approach to reporting Scope 2 emissions.

**Row 1**
- **Scope 2, location-based**
  - We are reporting a Scope 2, location-based figure
- **Scope 2, market-based**
  - We have operations where we are able to access electricity supplier emission factors or residual emissions factors, but are unable to report a Scope 2, market-based figure
  - **Comment**
What were your organization's gross global Scope 2 emissions in metric tons CO2e?

<table>
<thead>
<tr>

Explanation

CDP
(C6.7) Are carbon dioxide emissions from biologically sequestered carbon relevant to your organization?
No

(C6.10) Describe your gross global combined Scope 1 and 2 emissions for the reporting year in metric tons CO2e per unit currency total revenue and provide any additional intensity metrics that are appropriate to your business operations.

Intensity figure
While CBRE's revenue increased from 2016 to 2017, both Scope 1 and Scope 2 emissions decreased. Scope 2 reductions were primarily achieved through space attrition and efficiencies gained through our Workplace360 initiative. Each Workplace360 office is a "free address" environment, supported by leading-edge technology tools and platforms. Assigned offices and workstations are eliminated; instead, up to 15 different types of workspaces are offered based on carefully calculated employee usage patterns. In these new spaces, we have reduced our space footprint significantly while offering greater functionality and flexibility. This has resulted in lower energy use and greenhouse gas emissions. Also in 2017, our fleet count decreased due to a reduction in the number of owned vehicles associated with client-managed accounts. We also saw a decrease in average per-vehicle miles in our EMEA region. These factors led to our Scope 1 emissions reduction.

C10.2

(C10.2) Do you verify any climate-related information reported in your CDP disclosure other than the emissions figures reported in C6.1, C6.3, and C6.5?

No, we do not verify any other climate-related information reported in our CDP disclosure.
C11. Carbon pricing

C11.1

(C11.1) Are any of your operations or activities regulated by a carbon pricing system (i.e. ETS, Cap & Trade or Carbon Tax)?
No, and we do not anticipate being regulated in the next three years

C11.2

(C11.2) Has your organization originated or purchased any project-based carbon credits within the reporting period?
No

C11.3

(C11.3) Does your organization use an internal price on carbon?
No, and we do not currently anticipate doing so in the next two years

C12. Engagement

C12.1

(C12.1) Do you engage with your value chain on climate-related issues?
Yes, our customers

C12.1b

(C12.1b) Give details of your climate-related engagement strategy with your customers.

**Type of engagement**

During 2017, CBRE registered and benchmarked a record-breaking 6,197 buildings, representing more than 370.7 million square feet, in the U.S. Department of Energy’s ENERGY STAR program. CBRE’s 349 labeled buildings under management represent 3.5% of all 9,904 U.S. office buildings labeled in ENERGY STAR. We manage another 907 properties with a score of 75 or above that are either currently in the ENERGY STAR application process or are eligible to apply. In 2017, we made a significant improvement in energy efficiency with our core office portfolio, totaling 1,707 buildings. This portfolio has an average ENERGY STAR score of 80.3 and achieved an average reduction in site energy use of 16.2% compared to prior year.

Our Global Energy and Sustainability team provides comprehensive energy and sustainability services to our clients, focusing on fact-based outcomes that lessen environmental impact – generating both immediate results and long-term financial benefits through key integrated strategies. Our team includes more than 220 energy and sustainability experts and experienced professionals. Services provided include data management, smart buildings systems integration, energy consulting, energy procurement solutions, certification services and sustainability consulting. In 2017, globally, 6,788 buildings under management totaling 1.895 billion square feet were provided with energy and sustainability services. This equates to approximate 34% of buildings under management, which is the number that we used for the size of our engagement.

(C12.3c) Enter the details of those trade associations that are likely to take a position on climate change legislation.

**Trade association**

We support and promote BOMA's position on voluntary and incentive-based programs for reducing GHGs through our client services and messaging. However, we have also actively advocated for BOMA to take a different position on building energy disclosure. BOMA supports voluntary and incentive-based programs for reducing greenhouse gas emissions, and believes that buildings should accrue credits or offsets in a regulatory cap and trade program. BOMA opposes cap and trade policy options that do not reinvest funds raised into energy efficiency and would increase costs to businesses without reinvesting to effectively accomplish its environmental objective. However, CBRE generally supports regulatory requirements for building energy disclosure, which BOMA consistently opposes.

Mixed

Building Owners and Managers Association (BOMA)

**Is your position on climate change consistent with theirs?**

We support and promote BOMA's position on voluntary and incentive-based programs for reducing GHGs through our client services and messaging. However, we have also actively advocated for BOMA to take a different position on building energy disclosure. BOMA supports voluntary and incentive-based programs for reducing greenhouse gas emissions, and believes that buildings should accrue credits or offsets in a regulatory cap and trade program. BOMA opposes cap and trade policy options that do not reinvest funds raised into energy efficiency and would increase costs to businesses without reinvesting to effectively accomplish its environmental objective. However, CBRE generally supports regulatory requirements for building energy disclosure, which BOMA consistently opposes.

(C12.3e) Provide details of the other engagement activities that you undertake.

We are involved with a number of organizations that could either directly or indirectly influence public policy on climate change. These include:

* We are a member of the Center for Climate and Energy Solutions’ (C2ES) Business Environmental Leadership Council (BELC). BELC engages businesses in developing efficient, effective solutions to the climate problem.

* We are a member of the Global Real Estate Sustainability Benchmark (GRESB), an industry-driven organization committed to assessing the ESG performance of real assets globally, including real estate portfolios and infrastructure assets. Additionally, Francijn de Ruijter of CBRE Global Investors sits on the GRESB Real Estate Advisory Board, Jessica Feng of CBRE and Yilan Koh of CBRE Global Investors sit on the GRESB Asia Benchmark Committee, Dave Pogue of CBRE sits on the GRESB American Benchmark Committee, and Emma McMahon of CBRE sit on the GRESB Australian Benchmark Committee.

* We have been involved with the Sustainability Accounting Standards Board (SASB), which sets industry-specific standards for corporate sustainability disclosure, with a view towards ensuring that disclosure is material, comparable, and decision-useful for investors. CBRE joined as a member of the SASB Alliance in 2017. Laura Tyson, a member of the CBRE Board of Directors, sits on the SASB Foundation Board of Directors. Additionally, CBRE has provided feedback to SASB on many occasions.

The nature of our engagement with these organizations has also included thought leadership and advisory on climate strategies in commercial real estate, speaking engagements and sponsorships.

---

(C12.3f) Determine and disclose thegranular emissions data for the period and quantify impact of your activities.

---
(C12.3f) What processes do you have in place to ensure that all of your direct and indirect activities that influence policy are consistent with your overall climate change strategy?

We recognize that our leadership in the commercial real estate industry requires that we have a voice in how the commercial environment is built, sourced, traded and managed. All climate change strategy and activities are managed through the corporate responsibility team, ensuring consistency in all aspects of our engagement with internal and external stakeholders.

C12.4

(C12.4) Have you published information about your organization’s response to climate change and GHG emissions performance for this reporting year in places other than in your CDP response? If so, please attach the publication(s).
